FREDERICTON, N. B.

A military uniform has a peculiar attraction for some people, and when they become so impressed with its appearance as to think that there is nothing to compare with it or its wearers, they are said to have the "scarlet fever." The departure of the troops from Fredericton has always been regretted by a certain class of its citizens. This explanation is given to prevent misconstruction of the list and departure from description of it on page 22. Persons unacquainted with its history might infer that Fredericton was a very unhealthy and unpleasant place to live in. Such is not the case. It is one of the healthiest towns in the Province — the small increase in population is due to the attention paid to the advice to "go west" — and its only drawback is the manner in which the law regulating licenses to commercial travellers is enforced.

INFORMATION IS RESPECTFULLY REQUESTED

at as early a date as possible, from all

Railway Superintendents, Managers, Passenger Agents, Station Agents, etc., regarding the running of trains, connections (rail, steamer and stage), through fares to and from St. John and Halifax, and to all points in the Eastern Provinces to which they issue tickets, and all available information regarding the scenery, resources, business, attractions, hunting and fishing resorts, etc., of the country and towns through which their roads run; from

Steamboat Managers, Agents, Captains, regarding the attractions, etc., of their respective lines, distances, fares, connections, etc.; from

Stage Owners, Drivers, etc., as to the hours and days of arrival at and departure from the principal points, distances and fares from place to place, mode of conveyance, connections, etc., and anything of interest regarding the country or towns through which their respective lines run; from

Postmasters, garbing the business, industries, attractions, etc., of their respective towns; from

Hotel Keepers, the names, dates of arrival and departure of all prominent guests; from

Sportsmen regarding the location, and description of good hunting and fishing resorts, how reached, accommodations, guides, etc., reports of hunting and fishing trips, etc.; from

Manufacturers, statements showing number of hands employed, wages, amount of raw material used annually, value of manufactures, and such other information as may be of interest to strangers and a benefit to themselves; from

Miners, the location and description of their mines, kind, quantity and value of ore extracted, reports of new discoveries, etc; from

Everyone interested in the material prosperity of the Eastern Provinces, who desire to secure for this country by the sea the recognition of its claims as the Leading Summer Resort of the Atlantic Coast, reports of industrial developments of every kind, mining, lumbering, shipbuilding, fishing and agricultural notes, and anything else of interest to the traveller, tourist, or business man — citizen or stranger. NOTES AND NEWS.

NOVA SCOTIA cattle must be thorough-bred racers, if there is any truth in the following:—Whoever has had occasion to go from St. John to Halifax via Annapolis will be prepared to believe the following statement from the St. John News: "A train on the Windsor & Annapolis road was run into and telescoped in the rear by a brindle cow on Thursday." The slowest train on this road averages a mile in three minutes, including stoppages!

A LAZY man will go about the lakes for the summer, and claim that he has not time to send even a postal card to dear friends at home, and yet he will go out day after day and drop a line to fishes who love him not.

HALIFAX wants more and better hotel accommodations for summer tourists than she now possesses. There are not only plenty of good, healthy localities with pleasant surroundings that can be secured at low figures for that purpose, but there is a constantly increasing demand for the accommodation that a really first-class hotel would furnish.

Messrs. N. Keddy, W. E. Whebby and F. Harris, of Dartmouth, have been the bonanza anglers, in this vicinity, of the season just opening. On Monday of last week, at Fiddle Lake, Ch'zzzook, they caught ten trout which weighed 42 1-2 lbs., the weight of the largest one being 5 3-4 lbs. Two of the largest will be forwarded to the London Exhibition.— Halifax Chronicle.

INSTRUCTION OF FOREIGN STEAMERS.—The Boston Daily Advertiser of the 12th, says:—"Although the law requiring the inspection of foreign passenger steamers has been in operation at this port for over a month, and a number of vessels have been examined, only one full certificate has been granted, and that was given yesterday to the steamer Dominion, of the Nova Scotia Steamship Line. The Dominion is now running between Boston, Yarmouth, Annapolis and St. John.

The Fredericton Capital states that a somewhat rare ore of antimony, called "Valentinite," has been discovered lately at the Brunswick Mine, at Lake George, in Charlotte County, N. B. It is a heavy gray mineral, and is an oxide of antimony, while the ore commonly named "stibnite" is a sulphide. Valentinite has this singular property, that when it is heated to redness on coal, and the original source of heat then removed, it remains melted and glowing for some time, evolving dense white fumes. This phenomenon arises from the heat generated by the rapid oxidation of the surrounding air. Work at this mine is being rapidly pushed on.

INTRODUCTORY.

The Eastern Provinces Guide will be devoted to the joint interests of New Brunswick, Nova Scotia, and Prince Edward Island, and will endeavor to point out and describe the many and varied attractions of each impartially, and in such a manner as to induce strangers to visit us, and compel our citizens to admit that "there is no place like home." It is the aim of the publisher to make the Guide an indispensable necessity for travellers, and a powerful agent for the dissemination, at home and abroad, of such information regarding the industries, resources and attractions of these Provinces, which will dissipate some of the foggy misconceptions that hide us from the eyes of the world. To make the book a success and secure the objects aimed at, the hearty co-operation and support of the railway and steamboat companies, merchants, manufacturers, hotel proprietors, and every one interested in the prosperity of the country is needed.

To become thoroughly convinced of the necessity for the Guide, attempt to obtain information regarding any place in these Provinces! Many causes have combined to delay the publication of this the first number of the Guide (what they are only those who have attempted the publication of a similar work can understand)—part of the book was printed over a month ago! The second number of the Guide will be issued June 30th, or as soon as possible after the summer time tables of the different railways, etc., are published.

Railway and Steamboat Superintendents or Managers, Stage Proprietors, etc., are respectfully requested to send Time Tables, changes, etc., at the earliest possible date.

The July number will contain many items of interest, which were crowded out of this issue, and several new features, including a large map of the Eastern Provinces. 10,000 copies of about 96 pages will be issued and distributed free, as follows: viz.:—5,000 in the Eastern Provinces, 2,000 in the Upper Provinces, and 3,000 in the United States. The Guide will be issued promptly hereafter on the 5th of each month, and will be constantly enlarged to meet the requirements of the interests which it is designed to serve. Every citizen is or should be interested in the welfare of these Provinces, and a book designed to attract attention to the country should meet with earnest support. Every one can afford to subscribe for the book, and business men will find it the best medium through which to advertise their business.

SUBSCRIPTIONS.

The Eastern Provinces Guide will be sent to any address free of postage for one year from 1st July for 50 cents, if money is sent on or before that date. After July 1st the rate will be ONE DOLLAR per year; single copies 10 cents. Subscriptions may be sent in at any time and are payable in advance in all cases. Postmasters and Hotel Keepers who will agree to keep the Guide hung up in their offices for the use of the public will receive the Guide at one-half of the above rates. Extra copies to advertisers, $5 per 100.

TRAVALLEURS GUIDE.

ROUTES, DISTANCES, AND FARES

From St. John, N. B., and Halifax, N. S., to the principal Railway Stations, Steamboat Landings, and points on Stage Routes in the Eastern Provinces, with the population, principal business or attraction of each place. The Railways represented in this book are designated by letters, [Ga, Gb, Ge, etc., indicate different sections of the intercolonial, so also with the other roads]. Steamboat lines are designated by a capital $ with a small letter following: [Sa, Sb, Sc, etc.], the small letter indicates the route. Stage Lines are numbered, with a * before the No., thus, *10. [See the Railroad and Steamer and Stage Indexes]. These letters and figures are used whenever reference is made to any of the different lines of travel. A place sought for will be found in the time table of the last line designated in any given route to that place.

Where a $ follows rate of fare to any point the railway or steamboat fare to connecting point only is included. Local fares on railways average $c. p. r mile for first-class, and $e. for second-class. First-class fares are given in the following tables; Return tickets are from $1/2 to $1/2 more. Fares from St. John are given first in all cases. Abbreviations: p, population; m, mile; f, fare.

Acadia Mines, N. S., population 3,500. Canada Steel Company's Works and Iron Mine; employs 500 men; out-put 50,000 tons ore annually, which is made into pig and bar iron, car wheels, etc., valued at over $80,000. Ga $37, 270 m, f $4.72; from Halifax, Gd $37, 82 m, f $—.

Campobello Island—a mile and a half from Eastport, Me.—is rapidly advancing into a favorable repute as a Summer Resort, not through any particular beauty or attractions of the island itself, but because of its surroundings and the opportunities which its location affords for a variety of enjoyable excursions. The rough, begoggled Bay of Fundy on the one side; Passamaquoddy Bay, dotted with islands and sparkling in the sunlight on the other, are in striking contrast. The most misanthropic of mortals could not spend a summer on the sunny side of Campobello without great danger of falling in love—with Dame Nature. A sail boat carries passengers to and from the Island. $1 or $1.25; from Halifax, Gd, $1, 388, f $7.50, or [2] Ob, SJ or SJ, 255 m, f $5.50; from Boston via SJ, 300 m, f $7.50 return.

Charlottetown, the Capital of Prince Edward Island, is pleasantly situated on a neck of land, between North and Hillsborough Rivers. The streets are very wide, cross each other at right angles, and nearly all of them are lined with magnificent shade trees. It has five courthouses; six—two—four—two—of the Colonial Buildings (Eng), Market House, Law Courts and Post Office are in Queen Square. The Colonial Building is the finest structure on the Island, is built of Nova Scotia freestone, and cost $95,100. The other notable buildings are the Atheneum, Exchange, drill shed, skating rink, Prince of Wales, St Dunstan's (Catholic) and Methodist colleges, Normal and public schools, convent, lunatic asylum, jail [must have that, for rum is plenty, although they have the Scotch Act—not enforced], hospital, poor house, Government House, 8 churches, 3 breweries, 4 banks [one of "sand," caved about two years ago], woolen factory, foundries, machine shops, several furniture and carriage factories; also the head offices and workshops of the P. E. I. Railway. It is well supplied with newspapers and gas. It has a good harbor and a poor water supply; wide streets and narrow walks; a beautiful climate [fog is seldom seen] and plenty of mud, in the spring and fall; a large local and export trade—fish, lobsters, eggs, potatoes and oysters being the principal articles of export. The scenery around the city is very fine, no mountains or hills, but a gently rolling plain. A fine view of the city may be obtained from Southport, on the opposite side of the harbor. A steam ferry connects the two places. The P E I Ry [narrow gauge] runs East to Georgetown and Souris and West to Tignish, is 200 miles long [including the curves]. Several lines of steamers run to Charlottetown, connecting it with the outside world. Ga, Gb, Sm, Pa, 192 m, f $5.00; from Halifax, Gd, Ge, Sm, 163 m.

Chatham, N. B., on the right bank of the Miramichi River, 12 m from the north, is the largest and most enterprising town on the North Shore of the Province; contains many fine large buildings; is lighted with gas. Business is brisk and money plenty. Lumbering, shipbuilding and fishing are the principal occupations. Lumber is king, millions of feet of lumber being exported annually, but the fish trade is also very large. There are several foundries, machine shops and tanneries in the place; 6,000 Steamers run between C and Newcastle, 6 m; Indiantown, 26 m, and to Bay du Vin, 25 m. Ga, Gg, B, 172 m, f $4.50; Gd, Gg, B, 268 m, f —.

Chester, N. S., p 1,500; a beautiful summer resort, on Chester Basin, at the head of Mahone Bay. The basin is said to contain an island for every day in the year. The "Garden of Eden" is founded on Leap Year Island! An extensive fishing business is carried on here. SJ, OA *46, 186 m, f $3.25; from Halifax, OB *46, 117 m, f $2.15.

Coal Mines, N. B., p 350. Immense coal beds awaitig capital, 50, 77 m, f.

Country Harbor, N. S., p 400; gold mines, very rich and permanent; 300 m from Guysboro.
TRAVELLERS GUIDE.

Edmundston, N. B., or Little Falls, or Madawaska, as you please, the northern terminus of the N. B. R'y [Jf], situated at the confluence of the Madawaska and St. John Rivers, abounds of little except its scenery to interest the stranger. Viewed from Block House Hill, on the lower side of the Madawaska, Edmundston presents a lovely picture. The views from the town and the neighboring hills are superb—on the one side rugged and picturesque, on the other clothed with a mellow beauty that gives the scene almost a tropical aspect. Edmundston’s chief claim consists in its being the headquarters of the great fishing trips of the Upper St. John. FREDERICTON, the capital of New Brunswick and of York County, is beautifully situated on a level plain on the right or western bank of the St. John River, 81 miles from its mouth, and nearly opposite the mouth of the Nashwaak. The streets are wide, airy and quiet; cross each other at right angles—those running parallel with the river are over a mile long—and lined with maple trees, whose foliage is so dense that the city is almost hidden from the view of passers by on the river. It is one of the prettiest, if not the prettiest, place in the Province, and would be a very desirable place for a visit or residence, and a thriving manufacturing and trade centre only for two reasons. The “scarlet fever” raged there very badly several years ago, and it has not fully recovered from its effects—the pest houses [barracks] are still standing, constant and mute reminders of the “lamented departed.” It has such an exaggerated idea of its importance and prestige as the capital, the seat of the University of N. B., and the legal headquarters of the Province, and has existed so long on “Government pap” that strangers are looked upon as interlopers on vile mischief bent. The actions and behavior of the visiting that prevails is subjected to a system of espionage which is a disgrace to this free land, and scarcely warranted in the regions of dynamite and nihilism. Strangers visiting Fredericton are advised to keep their mouths closed upon all matters of business, unless they are prepared to contribute a few dollars for the support of the place. You can’t give them a lecture without paying for the privilege. It will pay to go there, however, to examine the different public buildings, enjoy its scenery and climate, visit its hotels, (which are A 1), and study the effects of exclusiveness. The population has increased very rapidly (?) in the last 10 years, in 1871 it contained 6,006, and in 1881 6,218 inhabitants —1,160 families! La, Da, 68 m, f $2.03; or (2) Sn 84 m, f $1.10.

Gibson, N. B., at the mouth of the Nashwaak, opposite Fredericton, was for many years the capital of Acadia under French rule, and the scene of many of the squabbles incident to the “grab game” for power during the early-history of this country. The remains of Ft. Nashwaak are still to be seen, and relics of various kinds are often found. One of the largest and best appointed saw mills in N. B. is at Marysville, 2 m up the river, and an extensive cotton mill is to be built there this summer at a cost of $1,000,000. It will employ 1,000 hands. For fares to Gibson see F'ton.

Georgetown, P. E. I., possesses one of the best harbors of the Island, open nearly all the year, deep and safe. Shipbuilding and exporting produce are the principal business. Ga, Gb, Sn, Pb, 228 m, f $5.10, or [2] Ga, Ge, Sm, Pb, 361 m, f §9.26; from Halifax, Gd, Gb, Ge, Sm, Pb, 209 m, f —?

Grand Falls, N. B. "The grandeur of the cataract, the rugged sublimity of the gorge, the fury of the rapids, the rich coloring of the rocks, the lovely outlooks from the high hills, the charming drape of the moonlight, cool air, the quaint customs of the habitants, first-class hotels, and the excellent fishing and shooting grounds within easy reach are attractions possessed by but very few, if any other, places on this continent." Here the St. John, after receiving in its upper course the waters of many lakes and streams, extending almost to the St. Lawrence, discharges the accumulated flood over a perpendicular fall of 74 feet into a rocky gorge not more than 250 ft. wide, with overhanging walls, in some places 240 ft. high. In passing through this rocky vault—which is about a mile in length, and the walls twisted and contorted in the most remarkable manner—the river has a further descent of 66 feet. A handsome suspension bridge spans the river immediately below the falls, and the best sight-seeing trips are to be had from it. It is rapidly becoming popular. Over 1200 guests registered at the American House in three months during 1871. This was before the railway was built, and the only means of travel was by stage or private conveyance! Grand Manan—an island in the Bay of Fundy, 9 m from the coast of Maine and inside of the Canadian boundary line, unsurpassed for grand and rugged coast scenery—far exceeding Mt. Desert in this respect. The towering cliffs rise in sheer ascent three or four hundred feet from the surf-beaten base, at one point strati- fied with geometric lines of perfect masonry, at others displaying the richest hues. The wave-worn rocks take on strange shapes—the Old Maid, the Bishop, the Southern Cross, etc., are striking examples. There are no harbors or landing places along the whole western shore—20 miles of massive rocks—but on the eastern side there are several small ones, with wharves and landings. The island has been a favorite resort for several years, and is destined in the near future to assume greater prominence as a summer resort, for, in many respects it is unequalled, all that is lacking is a good hotel. There are numerous ponds and brooks on the island which afford fair trout fishing, and a few deer are to be found in the woods. The island is covered with valuable timber, and has excellent facilities for shipbuilding, but cod, haddock and herring fishing constitute the chief employment of the inhabitants. The fishing around the island is often more profitable than on the banks of Newfoundland, and whales are very plentiful at times. A cable connects the island with the main land, and steamer connection is had with Eastport, St. John, etc., semi-weekly. S1, 78 m, f $2 25.

Grand Pre, N. S. "In the Acadian land, on the shores of the Basin of Minas, distant, secluded, still, the little village of Grand Pre lay in the beautiful valley. Vast meadows stretched to the eastward, giving to the village its name and pasture to flocks without number." Millions of people have read Longfellow's sad, beautiful, poetic description of this region, and the tragedy enacted here. Thousands have visited the place hallowed by the sufferings of a people scattered to the four corners of the earth; but he who did more than all other of human kind to render Nova Scotia famous, never stood 'neath "the murmuring pines and the hemlocks" of fair "Acadia." ninsula between the harbour and the North-West Arm—a beautiful sheet of water, about three miles long and half a mile wide. The streets are wide, straight, clean, and kept in good repair; cross each other at right angles, with few exceptions, and are, except in the business portion of the city, lined with shade trees. Hollis and Granville streets are the principal business thoroughfares, and contain the large retail and some of the wholesale houses. The heavy goods are handled by firms located near the water. Halifax does an immense business, although a stranger, judging from the general air of quiet and absence of bustle which characterizes the city, would have a different impression. A Yankee country village one fourth the size of Halifax would exhibit more life and animation in one day than would be seen in Halifax in a week. The people seldom seem in a hurry; they are seldom found in their places of business before 10 a.m., or after 4 p.m., and an hour or two between one and 2 p.m. is usually spent at luncheon or dinner! And yet they are wealthy! A large trade is carried on with the United States, Europe, and the West Indies. Large quantities of shipping are owned in Halifax, and manufactures of various kinds are operated by its people. Nearly all the manufacturing establishments are out of the city or on the back streets, consequently they are seldom seen or heard of. Halifax has many strong points of attraction for strangers, among which may be mentioned the Citadel, which crowns the hill upon and around which the city is built, and from which magnificent views of the harbor, the city and surrounding country may be had. The Provincial Building, on Hollis Street, said to have been the finest building in America 50 years ago; the new Provincial Building, also on Hollis Street, in which there is a museum open to the public; the fortifications on McNab's and Georges Islands and the different points about the city; the Dockyard, Public Gardens, etc. Bedford Basin at the head of the harbor is another possession of which Halifax is justly proud. Across the harbor on a hill is the busy town of Dartmouth, to all intents and purposes part of the City of Halifax, as most of the factories, etc. located there are largely owned by Halifax people. The Asylum for the Insane, a large, handsome granite structure, is located here. The Montague Gold Mines, 4 miles back of the town, have produced considerable gold; and 10 miles down the harbor is the favorite bathing resort of Cow Bay. The population of Halifax numbered 36,054 in 1881, an increase of 6,402 in 10 years, or about 31.5 per cent. TRAVELLERS GUIDE.

Louisbourg, C. B., once the strongest fortified city in the world, alike the pride and glory of France and the dread of New England, is to-day a mass of shapeless ruins, and a fit memorial of the fate which befell French power and dominion in America. Where once was heard the merry shout of childhood, the song of mirth, the tramp of armed men, the soul-stirring strains of martial music, the hiss of the rifle ball, the rush and roar of cannon shot, or the cries and groans of the wounded, naught is heard save the dreary moan of the sea, or the scream of the gulls. Its great strength was the cause of its destruction, and the "Dunkirk of America" became a scene of utter desolation. Even the stones of which it was built—which were brought from France and bathed in the blood of her bravest warriors—were carried away. The capture of Louisbourg by the undisciplined troops of New England was a marvellous feat, and filled the world with astonishment. Every New Englander should feel it his duty to visit the scene of his forefathers' glorious deed. "On Point Rochfort—the site of the old burying ground—beneath a patch of dark greenwood lies the ashes of hundreds of brave New Englanders. No monument marks the sacred spot, but the waves of the restless ocean sing an everlasting requiem over the graves of the departed heroes." Newcastle, N. B., (or Miramichi) on Miramichi River, at the head of deep water navigation, is a veritable sportsman's paradise. About 100 tons of salmon are caught in the waters of the Miramichi river every year. As for trout, they are as plenty as flies around a syrup cask. Fishing and lumbering are the principal occupations of the people. Shipbuilding is engaged in extensively also. A steamer makes frequent visits to the hamlet, 6 m down the river. Newcastle was almost entirely destroyed by the great fire which devastated the country in Oct. 1825. Not one uninjured house was left in the place; hundreds were burned to death, suffocated by the smoke, or drowned in the river, to which they had fled for safety. The water became so hot that large salmon and other fish leaped on shore, and were afterwards found lying in heaps along the banks of the river. It is located here, and turns out only the coarser grades—for wrapping, bags, etc. A chance for capitalists. Ga, 51 m, f $1.50; from Halifax—Gd, 225 m, f—

Pictou, N. S., is a city set on a hill, facing Pictou Harbor, in the county of the same name, of which it is the Capital. The town is substantially built, and contains some fine buildings. The climate is mild and healthy, the scenery charming, and excellent facilities for boating and bathing abound. Manufacturing is largely engaged in, but the shipment of coal is the principal business of the port; p 3,500. The site of the town was given to an army officer, who sold it for a horse and saddle (1767-71). Coal was discovered near here in 1798, but the exportation was small till 1829. Ga, Gc, 266 m, f $2.86; from Halifax—Gd, Ge, 114 m, f $3.25?

Port Hastings, C. B., (or Plaister Cove). The repeating station of the Atlantic Cable Co., and the distributing point of mails for Cape Breton. Exports fish, cattle, and produce to the United States, N'fd, etc. Connected with Pt. Mulgrave by a steam ferry. See Pt. Mulgrave.

Pt. Hawkesbury, C. B., 4 m from Pt. Hastings, on Ship Harbor—the best on the Straits of Cano. Does a large fish, produce, and lumber trade, and is a port of call of all steamers passing through the Straits, or through the Bras d'Or. Has 2 or 3 saw mills and 2 marine railways. Fares to Charlottetown, F. E. I., Sn, $3.50, to St. John and Halifax see Pt. Mulgrave.

Pt. Hill, F. E. I., shipbuilding, saw and grist mills; from Summerside, Pa, 22 m, f 55c.

Pt. Mulgrave, N. S., the Eastern terminus of the Halifax and Cape Breton Railway (F). An all important fishing station on the western side of the Straits of Cano. —"The Golden Gate of the St. Lawrence Gulf," and directly opposite Pt. Hawkesbury. Gold bearing quartz is found in the vicinity; p 650. Ga, Ge, Fa, 387 m, f $7.90; Gd, Ge, Fa, 185 m, f—

**TRAVELLERS GUIDE.**

Richibucto, N. B., capital of Kent Co., near mouth of Richibucto River, has a very large lumber and fish trade; the exports of canned oysters during the season of 1882 were 11,917 cases, valued at $711,412. Shipbuilding is largely engaged in; p 1,000. Ga, Gg, *11, 132 m, f $3.57;* from Halifax — Gd, Gg, *11, 831 m, f?*

Rothsay, N. B., on the shores of the beautiful Kennebecasis River (Can-e-be-ka-sius the hoodlums call it), admitted by sporting men to be the finest race-course in the world; 9 miles from St. John. Is one of the prettiest places on the Intercolonial Railway, and the home of many of St. John’s solid men. With excellent facilities for boating and bathing, fine scenery, pleasant drives, and freedom from fogs, it should have more than a local favor as a summer resort.

Rustico, P. E. I., is to Charlottetown what Rothesay is to St. John—a pleasant, convenient retreat from the cares and bustle of business; but it has one advantage over Rothesay—a first-class hotel. Surf-bathing, boating, cod and mackerel fishing are some of its attractions. It is one of the best fishing stations of P. E. I.; from Charlottetown by team 16 m, or P. E. I. Railway to Hunter River, and stage 7 m.

Sackville, N. B. Seat of the Mt. Allison College and Academies (Methodist). The town contains about 2,000 people, but they are as badly scattered as the Israelites, the houses being so far apart that there is no place which can be called Sackville. It contains one of the largest stove foundries in the Province, several shipyards, etc., and raises the finest of cattle. Ga, 127 m, f $3.56; from Halifax, Gd, 149 m, f $4.00?

St. Andrews, N. B., has long been noted as one of the finest health resorts in North America; and a summer spent amidst its delightful scenery—sailing on beautiful Passamaquoddy Bay, picnicking on the adjacent islands, fishing in the picturesque Lake Utopia, the home of the “Utopian Monster,” roaming the forests in search of game, climbing Chamcook Mt. from whose “glacial rounded top” a view may be obtained which recalls recollections of the Bay of Naples as seen from Mt. Vesuvius—breathing the clear, pure air, is a sure cure for hypochondria and hay fever. Mere existence at St. Andrews is a delight; but one can’t keep still, the air is so exhilarating. The Argyle, the largest hotel in the Eastern Provinces, entertained 1,700 guests last season, and many of its rooms were engaged for this. St. Andrews is one of the best fishing stations of New Brunswick, the capital of Saint John County, terminus of the N. B. R’y, is well and regularly laid out—its buildings are poor and sadly in need of paint, but this defect will be soon remedied—and noted for the excellent quality of its turnips; from St. John, Lb, Jd, 129 m, f $3.00; or (2) Eb, Jd, 80 m, f $2.30; or (3) Si, (and connections) 75 m, f $1.75; from Boston, by Eastern, Me. Cent., and N. B. R’y’s, or International Steamers (Si), to Eastport and Steamer from there. Daily communication with Campobello—another Eastern Provinces Summer Resort via Eastport, Me., 15 miles distant.

St. George, N. B., on the Magaguadavic River (river of mills), 4 m from its mouth and at the head of tide, is noted for its red granite and beautiful falls. The river is compressed into a gorge 30 feet wide and falls 100 feet in five successive steps. There are 4 large saw mills here and as many more at Upper Mills, 9 m above; and the lumber shipments from St. George are very large. Ea, 47 m, f $1.50.

TRAVELLERS GUIDE.

SAINT JOHN— the chief City in New Brunswick in point of population, wealth, commercial and political importance, and social influence—occupies a commanding position on a rocky peninsula at the mouth of the River Saint John. This peninsula, or ridge, is about a mile long, half a mile wide, and 70 or 80 feet above the sea level in the centre, with its sides sloping gradually toward Courtenay Bay on the East and South, and the River and Harbor on the West. North of this ridge, and overlooking it, are the heights of Portland, which run due East and West, and make a magnificent back-ground for the City. A deep valley runs between the City and these heights, and through it the dividing line between Saint John and the new-born City of Portland. (It is scarcely two months old, but thinks it can run alone!) Practically it is part and parcel of Saint John, with interests and aims identical, but has a separate Municipality. Many of its citizens have the places of business in Saint John, and Saint John citizens are interested in Portland's business. It is built along the base and on the sides and top of the heights—stretching away to the West in a narrow line a mile or more long. Carleton, or the "West side," with its streets sloping from the heights in rear of the town, its pretty churches and neat dwellings, its tall chimneys, smoke-pennoned and black—marking the sites of mills and factories—adds beauty and interest to the City, of which it is an outgrowth and part. "On the summit of the highest hill in Carleton is a venerable and picturesque stone tower, which gives an antique and feudal air to the landscape." The views from Portland and Carleton heights are superb. The City, with its massive buildings and numerous church spires; the harbor, filled with shipping; Courtenay Bay, with Crouchville and the hilly country beyond, on the East and South-east; Partridge Island, at the entrance to the harbor, to the South; Negrotown Point and breakwater on the right; the Bay of Fundy stretching away to the horizon, to the South and Westward, dotted here and there with vessels of different kinds and sizes; Nova Scotia, blue and indistinct in the distance, combine to form a picture of great beauty. Saint John is well laid out, the streets are broad and airy, and, throughout the greater portion of the city, cross each other at right angles. Owing to its elevated position, and the solid nature of its foundations, the streets are dry and perfectly drained. Many years labor and vast sums of money have been expended to bring the streets of Saint John to their present state of perfection—many of them have been cut down from thirty to forty feet through the solid rock, and will have to go still lower! The sidewalks, generally, are in good repair, and made of asphalt, plank, or solid rock. There is but seventy or eighty feet of brick sidewalk, and not one foot of stone in the city! The principal Streets are King, Prince William, Water, Dock, Germain, and Charlotte. Most of the leading wholesale and retail Dry Goods Houses, etc., are located on King and Canterbury Sts., and Market Square. The Banks, Post Office, Custom House, City Building, etc., are on Prince William Street, which runs South from Market Square to Reed's Point Wharf—the point of arrival and departure of Steamers for Nova Scotia, the United States and Europe. Water Street and the adjoining wharves is like all other "water" streets. Germain Street is the Church Street of the City, there being one Baptist, two Presbyterian and two Episcopal or English Churches on it. The Masonic Hall, Market Building (runs through to Charlotte Street, see cut page 49), and several fine stores are located here also. Charlotte Street runs South from Union Street, along the West side of King Square to the deep water terminus of the Intercolonial Railway. The Young Men's Christian Association building is near Union street, and the Odd Fellows Hall on Union, at the head of Prince William Street. King Square, at the head of King Street, and between Charlotte and Sydney Streets, is one of the few green places in the city. Hotels

and saloons line the street on the North side; the Court House is on the South-east corner of King Street East and Sydney Street; the Jail and Police Office (a model of architectural skill), are in the rear of the Court House.

The Old Burying Ground, a delightful retreat, and the last resting place of many of the early settlers of St. John, is opposite King Square—between Sydney and Carmarthen Streets—and is well worthy of a visit. It is difficult to realize that this burying ground was "some distance out of town," and King Square an almost impassable bog less than sixty years ago; that the whole peninsula on which the city is built was clothed with a dense forest, the lurking place of savages and wild beasts; and, more difficult still, to realize that less than six years ago there was not enough left of St. John to form a decent sized country town; that the whole section of the city South of King Street and West of a line running Northwest from Canterbury to York Point, embracing nearly the whole business portion, and containing over two hundred acres, was a mass of smoking ruins, with but one or two small buildings left standing! - that where these fine blocks of stores, offices, banks, public buildings, churches, and beautiful residences now stand, naught was to be seen but heaps of rubbish! Over $30,000,000 worth of property was destroyed here on the 20th of June, 1877, inside of ten hours. More than sixteen hundred houses were burned, and their occupants left homeless, and in many cases penniless.

The city presents an entirely different aspect to-day from what it did before the fire. The greater portion of the burnt district has been rebuilt, and in a substantial manner. Brick and stone structures have superceeded wood in most cases. Among the other places and buildings of note in and about the city may be mentioned the Wiggins Male Orphan Asylum and the Marine Hospital, on St. James Street (East end), the Roman Catholic Cathedral, Orphan Asylum and Convent, and the Public Hospital, on Waterloo Street, the Exhibition Building on Sydney Street (South end), the Mechanics' Institute, on Carleton Street. Lily Lake—a beautiful sheet of water, behind Portland heights, or Mount Pleasant, is a favorite resort, summer and winter, for the youth of the city and Portland—in the summer for boating, and during the winter for skating. The Rural Cemetery, one and a half miles out on Marsh Road, is a beautiful place, with winding drives and pathways running in all directions around the rocky knolls and through the dense growth of evergreens. Loch Lomond, (Ben Lomond House), eleven miles from the city, is a favorite Summer Resort, and, when the Saint John South-eastern Railway is completed, will be one of the most popular places in New Brunswick. The scenery is very beautiful; trout from one quarter to ten pound weight are abundant in the Loch Lomond Chain and the numerous lakes and streams near by; woodcock, partridge, snipe and duck are plentiful, and first-class board at reasonable rates may be obtained. (The Railway will cross Court enay Bay on a trestle bridge to Little River, thence to Loch Lomond and on to Barnesville, where it will connect with the St. Martins and Upham Railway for St. Martins (for Quaco), a beautiful little watering place, thirty miles distant, on the "Bay of Naples," as its admirers call it. A first-class hotel is being built there for the accommodation of summer guests—reached by Ga Ma, 52 miles, fare $1.35). Mispeck, 9 miles from St. John (on the Red Head road), on the Bay of Fundy, at the mouth of the Mispec River, and amidst scenery which would drive a painter mad with delight, possesses a water power of sufficient force to drive every mill and factory in New Brunswick—if properly utilized—but the only use made of it is to drive a small woolen mill and a saw mill. The river for 5 or 6 miles above the village presents a series of

delightful views — falls, rapids, perpendicular cliffs, deep gullies, or flat intervales — which are unequalled. Dams could be built at different points along the stream and at slight cost; but don't attempt to go up it if you are given to profanity!

Carleton, or the "West Side," is the terminus of the St. John and Maine, and Grand Southern Railways. Contains a Town Hall, Masonic Hall, several churches and schools, many handsome residences, saw mills, foundries, machine shops, shipyards, fish canning establishments, etc. The ruins of Fort La Tour may be traced on the point of land opposite Navy Island. The story of Madame La Tour's heroic defence of her husband's rights and property,— the revengeful cruelty of her captor, and her sad death from grief and exposure, has been the theme of many a writer. A fine view of the Suspension Bridge, which spans the rocky gorge through which the waters of the St. John find their way into the ocean, may be obtained from the Northern part of Carleton.

The Riviére St. John is over 450 miles long, and has an almost uninterrupted navigable length of nearly 530 miles, and drains over 15,000,000 acres in its course to the sea. The immense accumulation of waters is emptied into the harbor through a gorge in some places not more than 450 feet wide! Whirling, twisting, white with foam, headlong with unresisted sweep, the waters seek the ocean wide. The fall is about 15 feet into the sea at low water, but at high tide the fall is as great the other way, and the river runs up stream with as great force and rapidity as it ran out before. There is but one other place in the world where a like phenomenon occurs! Steamers, sailing vessels, and small boats pass through the falls in smooth water, at certain times of the tide. The bridge was built in 1882, at a cost of $350,000; has a span of 640 feet; is 72 feet above high water; is hung on 10 cables; supported on four towers 53 feet high, and contains 570 miles of wire. A railway suspension bridge is to be built here immediately. The Lunatic Asylum, a handsome brick structure, is on a hill West of the bridge, and a quarter of a mile Northwest is the busy little town of Fairville. A mile above the bridge, on the East side of the river, the wharves and buildings of Indiantown, a suburb of Portland, and starting point of the river steamers, can be seen. Many fine views of St. John and its surrounding may be had from the road back through Portland, but nothing of interest is to be seen in Portland itself, until the railway track near the boundary line of the two cities, is reached. The Intercolonial Railway Freight sheds, several hundred feet long and just completed, are to the left, on Pond Street, and a large passenger depot is to be built here this summer. The St. John and Maine, and probably the Grand Southern Railway will have terminal facilities here after the suspension bridge is built. There are about fifty places of worship in Saint John, Carleton, Portland, Indiantown and Fairville; several handsome school buildings; a number of religious and charitable societies, two public libraries, one in Portland and one in the city, and another to be opened shortly. There are two Banks, four Bank agencies, two Bankers, and one Savings Bank in St. John; 4 daily papers, 2 morning and 2 evening, and several weeklies. St. John and Portland have efficient fire brigades. The Fire Alarm telegraph; a first-class water supply (brought from Little River, 5 miles distant, through three large mains, and distributed through 67 miles of pipe, 10,000,000 gallons daily); several first-rate hotels, and boarding houses innumerable — good, bad, and indifferent. Saint John may be said to be the centre of the Railway system of the Eastern Provinces — the St. John and Maine connects it with the United States, and the Grand Southern, when extended as proposed, will form another link. Both of these roads intersect the New Brunswick Railway, and this road will soon be connected with the Intercolonial at River du Loup, and also with the Megantic Railway. The Intercolonial connects the city with Nova Scotia, Cape Breton, Quebec and Ontario, and the St. John and Northeastern can connect it with St. Martins and Hampton via Barnsville; from Hampton it will run to — a railway is like a balloon, its course depends entirely on the "wind." The position of Saint John, on one of the finest harbors in the world — in some respects it is the best, being safe, easy of access, and frost-proof; ice never forms in it — and at the mouth of one of the largest rivers in North America; with direct steam communication to Nova Scotia, the United States and Europe; an immense fleet of vessels, built, owned and manned by her own citizens, sailing to all parts of the globe; and every facility for the handling and shipment of goods, and for manufacturing, are sure indications of what it is and of what it will become. That St. John is a manufacturing, as well as a trade centre, can be seen at a
glance. Mills, foundries, machine shops and factories are scattered all over the city and suburbs. Everything—from a carpet tack to a local motive; from a packing case to a ship; a wheelbarrow to a railway carriage; cotton cloth, woolen cloth or merino goods; neckties, shirts, or halters; boots—lasts to make them on and brushes to clean them with; a buck saw or a circular; a tea kettle or steam boiler; cradles or coffins; an organ or a fog horn; washboards or pianos, are made here. Most of the factories are small, and in keeping with the capital, but not with the desires and aspirations of the citizens. The bonfire of the 20th June, 1877, cost so much that the citizens of St. John have been compelled to act cautiously ever since. A good evidence of their business tact, energy, and conservativeness is shown by the fact that notwithstanding the losses caused by the fire, the city has been rebuilt in a first-class manner, many new industries have been started, and there has been but one failure here of over $1,000 in the last year! St. John merchants do not believe in over trading, and can therefore meet their bills when they come due. St. John is the leading shipping port of the Dominion, (the fourth largest in the world) and all that she needs to become the leading importing and manufacturing city of the Dominion is additional capital and a fixed determination on the part of her citizens to utilize to the utmost the immense advantages which her position affords; to make the best of a bad bargain, and insist upon a proper recognition of her rights. The business prospects of St. John for this year are very encouraging. Over $650,000 will be expended for the new Intercolonial Railway Station, Suspension Bridge, Marine Hospital, Breakwater, Exhibition Building, Canada Rolling Stock Company’s workshops, Carleton Post Office, and on the St. John and Northeastern Railway. Add to this the Exhibition expenditure, private building operations and amounts received from tourists, visitors to the Exhibition, etc., and the extra income of St. John for 1883 will amount to over $1,500,000.

On the 18th May, 1783, twenty vessels with three or four thousand people arrived in the Harbor of St. John. Although settlements had been often founded here, they were as frequently broken up. St. John was the objective point of many of the marauding parties which visited the Bay of Fundy between 1630 and 1680; French Catholics, Huguenots, colonists, English, pirates and Indians succeeded each other in rapid succession as masters of St. John. But little regard was paid to the lives or property of settlers along the river by its temporary rulers, and the weary band of self-exiled Loyalists landing in an almost unbroken wilderness, founded the City of St. John.

Born and reared under the Cross of St. George, they preferred poverty and hardship under British rule to ease and plenty under the Stars and Stripes, and forsaking homes, lands, friends and early associations, they sought new homes for themselves amid the wilds of Acadia. Actuated originally by loyalty to the British Government they gradually became imbued with the bitterness incident to a civil war, and found themselves at its close liable to reprials for their conduct. But, no matter what their course during the war, the “United Empire Loyalists” are worthy of honor for their patriotism. Their descendants purpose honoring their memory in a becoming manner during this centennial year. The 18th inst., or Loyalists’ Day, will be specially observed, and a grand Exhibition will be held here in October.

St. Stephen, N. B., the terminus of the New Brunswick and Grand Southern Railways, and at the head of navigation on the St. Croix river—the boundary between Maine and New Brunswick—is the liveliest town in western N. B. Owing to the intimate business and social relations which exist between it and Calais, on the opposite side of the river, it resembles a Yankee town very much. A toll bridge connects the two places. It is lighted with gas imported from Calais; whether it pays any duty on it or not is uncertain, but that the people of Maine do not pay duty on the immense quantities of rum in which they invest and spirit across in bottles, etc., is well known. Lumber, manufacturing and shipping is the principal business, but a large general trade is done also. Milltown, two miles up the river, contains 18 saw mills, edge tool and saw factories, and a large cotton mill, employing about 400 hands. Steamers run daily between Calais, St. Andrews, N. B., and Eastport, Me. Lb, Jd, 120 m, f $3; or (2) Eb, 82 m, f $2.50; or (3) Si, 90 m, f $1.75.

Waverly, N. S., p 650; gold mining, 3 mines worked 1, 2,238 days labor performed, 554 tons ore crushed, yield for 1882 234 oz, 7 dwts, 5 grs; this is the locality of the wonderful barrel quartz; 3 m from Windsor Junction (see).

Weymouth, N. S., at mouth of Sissiboo river on St. Mary’s Bay; shipbuilding. SJ, Na, 65 m, f $2.30; from Halifax Ob, SJ, Na, 171 m, f $6.50.

Wilmot, N. S., p 350; mineral springs 3 m distant, said to be very efficacious in the healing of wounds and cutaneous diseases; contains several saw and grist mills. SJ, Na, 93 m, f $2.95; from Halifax Ob, 98 m, f $3.

Windsor, N. S.,—famous as the birthplace and residence of Sam Slick (Judge Haliburton), as the seat of King’s College, the oldest college in Canada and the leading educational institution in Nova Scotia—is beautifully situated on the Avon river, at the mouth of the St. Croix. "I should think it would be confusing to dwell by a river that runs first one way and then the other and then vanishes altogether." (Warner). Did you ever see a Virginia clay bank after a heavy rain?—that’s the Avon at low tide! Wharves, banks, boats, everything which the water has touched, looks as if covered with a dirty, slimy, brownish red paint! There are several large manufacturing establishments here; shipbuilding is largely engaged in, has a large export trade in gypsum, p 3,029. SJ, Oa, 145 m, f $1; from Halifax Ob, 45 m, f $1.35.

Wolfville, N. S., p 1230; shipbuilding. Acadia College (Baptist) is finely located on a hill overlooking the Basin of Minas and the Annapolis Valley; the view from the belfry of the College is said to be the finest in the eastern provinces. SJ, Oa, 127 m, f $3.50; from Halifax Ob, 61 m, f $1.95.

Woodstock, N. B., the capital of Carleton County—the best built district in the Province—beautifully situated on the west bank of the St. John River, at the mouth of the Meduxnekeag, is the most energetic and enterprising town in Northern New Brunswick. It has been so frequently destroyed by fire that it resembles an ignis-fatuus—here one minute and gone the next. It is a veritable Phoenix, however, improves every time. Saw mills, grist mills, foundries, factories of various kinds, machine shops, etc., when burned are immediately rebuilt. Insurance Companies will have to seek another safety valve for their surplus capital to escape through, as Woodstock has got tired of fire and intends to try the effects of a good water supply. The head offices, shops, etc., of the New Brunswick Railway are located here. Extensive and peculiarly valuable deposits of iron ore are being worked a few miles above Woodstock. La, Je, 136 m, f $3.50; or (2) La, Da, Ja, 131 m, f $3.50; or (3) Sn, Ja, 147 m, f $3.50.

Yarmouth, N. S., is the largest ship-owning port in the world, in proportion to population, and the most American town in these provinces—Woodstock or St. Stephen, N. B., not excepted. It is 6 m in the sea on a small river which is nearly dry at low tide. It contains several fine buildings — the Seminary is the largest wooden building and the School the best of the kind in the Province. It contains two or three large first-class hotels, a woolen factory which turns out 350 yards of cloth daily, foundries, machine shops, shipyards, etc. The Nova Scotia Steamship Company is a Yarmouth institution; p 6,280. SJ, Na, 110 m, f $3.50; or (2) Sk, 90 m, f $2.50; from Halifax Ob, SJ, Na, 215 m, f $3.50.
